Are you ready for what's next?

Come explore opportunities within [Brunswick, a global marine leader](#) committed to challenging conventions and innovating next-generation technologies that transform experiences on the water and beyond. Brunswick believes "Next Never Rests™," and we offer a variety of exciting careers and growth opportunities within united teams defining the future of marine recreation.

Innovation is the heart of Brunswick. See how your contributions will help transform vision into reality:

Position Overview:

The Boating Intelligence (BI) Design Lab is seeking a passionate and innovative Software Engineering Intern to join our cutting-edge R&D team in the recreational boating industry. The role will involve active participation in all stages of our projects, from concept/solution ideation to prototyping and testing applications on hardware. This position offers an exciting opportunity to contribute to developing web and mobile applications that enhance our customers' boating experience.

This is an ideal opportunity if you are enthusiastic about tackling complex customer problems using technology and have a natural curiosity and a passion for experimentation, learning, and continuous improvement. You will gain hands-on experience at the intersection of R&D, Software Engineering, and the recreational boating industry, contributing to impactful projects in a dynamic R&D environment.

At Brunswick, we have passion for our work and a distinct ability to deliver.

Essential Functions:

- Analyze, ideate, and prototype solutions for various problems/tasks from the recreational boating space.
- Work closely with the development team to design, build, and refine software solutions, focusing on web and app development.
- Leverage Java/Kotlin, JavaScript, or Python to develop rich consumer-facing applications. Additional experience with web/app development frameworks is a must.
- Develop Android-based applications and test on an Android platform-based device.
- Create app layout/user interface by using standard coding best practices
- Integrate data from various back-end services and database

Diversity of thought and experiences is fundamental when imagining the unimaginable. Certain skillsets/experiences are necessary; however, others can be developed along the way.

Required Qualifications:

- To be considered for the internship, candidates must have permanent US Work authorization.
- Freshmen-Junior in Computer Science or Computer Engineering.
- Prior experience with Software Engineering or Web/App development (Industry, Internship, or project experience).
- Proficiency in Java/Kotlin and JavaScript (and/or Python).
- Strong understanding of Software Engineering principles and experience with Linux.
- Experience developing in frameworks such as React, React Native, or Android Studio

Preferred Qualifications:

- Pursuing Master's in Computer Science or Computer Engineering.
- Prior experience in a professional setting: leadership experience, internships, related RSOs.
- Professional experience developing in frameworks such as React, React Native, or Android Studio.

Travel Requirements:

No Travel is Required

Working Conditions:

Learning Opportunities: Our internships are designed to provide hands-on experience in a professional setting. You will work alongside experienced professionals and get a chance to apply your academic knowledge to real-world tasks.

Project Work: The work environment is supportive, collaborative, and conducive to learning. Interns typically work on specific projects or tasks that contribute to the organization's goals. This may range from supporting

larger projects to handling smaller, individual assignments.

Hours: Interns must work at least 8 hours in person at the lab each week during the fall and spring terms. You may work up to 20 hours maximum. During summer, interns are expected to work 40 hours in person at the lab each week.

Feedback and Performance Reviews: As an intern, you will receive feedback and performance reviews throughout your assignment. We value the importance for interns to understand their progress and areas for improvement.

Responsibility: Interns at BI Design Lab are expected to manage their own schedules, set goals, and seek feedback for their professional development.

Why Brunswick:

Whatever tomorrow brings, we'll be at the leading edge. As the clear leader in the marine industry, we're committed to our values and supporting our exceptional people. We offer valuable benefits including a competitive 401(k) plan with company match, health benefits, paid time off, a robust Wellness Program, and much more. In addition, we're proud of being recognized for making a splash with numerous awards!

Next is Now!

We value growth and development, recognizing that people come with a wealth of experience and talent beyond just the technical requirements of a job. If your experience is close to what you see listed here, please still consider applying.

Brunswick is an Equal Opportunity Employer and considers all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veteran status or any other characteristic protected by federal, state, or local law. Diversity of experience and skills combined with passion is key to innovation and inspiration and we encourage individuals from all backgrounds to apply. If you require accommodation during the application or interview process, please contact hrsharedservices@brunswick.com for support.
